FOR FOOD/FEED HANDLING ESTABLISHMENTS	
TEMPRO 1%, Dust applications are permitted in non-	
food/feed areas of food handling establishments only as a	
vold or crack and crevice treatment. It is not permitted in	
the food/feed areas of food/feed handling establishments.	
Food/feed handling establishments are defined as places	
other than private residences where exposed food/feed is	
held, processed, prepared or served. Included also are areas	
for receiving, storing, packing (canning, bottling, wrapping,	
boxing), preparing, edible waste storage and enclosed pro-	
cessing systems (mills, dairies, edible oils, syrups) of food.	
Serving areas where food is exposed and the facility is in	
operation are also considered food areas.	
Non-food non-feed handling areas of food/feed handling	
establishments include parlor rooms, reception, locker	
rooms, restrooms, janitor rooms, offices, boiler	
rooms, machine rooms, boiler rooms, garages, mop closets,	
and storage (after canning or bottling).	

IMPORTANT READ BEFORE USE	
Read the entire Directions for Use, Conditions, Disclaimer of War-	
ranties and Limitations of Liability before using this product. If	
terms are not acceptable, return the unopened product container	
at once. By using this product, user or buyer accepts the fol-	
lowing Conditions, Disclaimer of Warranties and Limitations of	
Liability.	
CONDITIONS: The directions for use of this product are believed	
to be adequate and must be followed carefully. However, it is	
impossible to eliminate all risks associated with the use of this	
product. Crop injury, pest resistance, or other unwanted conse-	
quences may result because of such factors as weather con-	
ditions, presence of other materials, or the manner of use or	
application, all of which are beyond the control of Bayer Crop-	
Science LP. All such risks shall be assumed by the user or buyer.

[illegible]

GENERAL PESTS		APPLICATION FOR PESTS
Ants	Apply to walls, cracks and crevices in and around doors and windows, baseboard cracks, and other places where ants enter structures.	
Bed bugs	Apply to areas such as mattress folds and tufts, spring coils, cracks or hollow places in bed frames, furniture upholstery, and picture frame moldings. Let powder remain on treated surface for 24 hours. Vacuum and wash bedding thoroughly, dispose of the infested bag properly, and place clean linens on the bed.	
Carpet beetles	Apply under edges of floor coverings, baseboard cracks, under rugs and furniture, and in cracks and crevices in closets.	
Clothes moths and silverfish	Apply to cracks and crevices in closets and other storage areas. This is an adjunct treatment and will not control moths and silverfish alone on the clothes. Do not apply to clothing.	
Fire ants	Use RATE 2 to 2 teaspoons of TEMPO 1%.	
House flies, roaches, and other pests	Apply, dusting the mound before applying. If possible, treat all colonies in the area. Distribute the product evenly over each mound and around the perimeter of the mound (about 3 inches from the outer edge). Use the lighter for best results, wear masks, gloves, and eye protection. High water pressures will cause the ants to move the mound.	
Termites	Treat new mounds as they appear.	
Wasps	Thoroughly seal nests and entrances and surround with insecticide. Do not spray directly into a hole in the area, just entrance and surround.	

FLYING PESTS	
Bees Hornets Wasps Yellow jackets	Thoroughly dust nests and entrances and surround areas; to treat nests in wall voids, drill a hole in the area, dust entrance and surrounding areas. Wear protective clothing if necessary to avoid stings. You may also help avoid stings by treating wasp and bee nests in the evening when the insects are less active and are inside the nest. For nest insects, check nests within one or two days to ensure complete kill. Remove and
