

CrossFire® Concentrate brings two actives to the fight against bed bug infestations. The result is fast knockdown and kill with direct spraying, plus residual control. CrossFire targets all bed bug life stages (adults, nymphs and eggs) and is scientifically formulated to kill pyrethroid-resistant bed bug strains.

Personal Protective Equipment (PPE)

- Long-sleeved shirt, long pants, shoes and socks
- No signal word

Mixing Instructions

1. Shake concentrate thoroughly for ten seconds prior to mixing with water
2. Add 0.5 gallons of water to tank before adding concentrate
Note: In colder temperatures, warm water will help the CrossFire formulation go into suspension
3. Add 13 fl. oz. of concentrate (with 130 oz. jug, measure 5 + 5 + 3 oz. to avoid spillage)
4. Add the remaining water to produce exactly 1 finished gallon
5. Shake thoroughly to ensure proper suspension

Application Methods

- Spray tank solution should be shaken every 15-20 minutes during application
- Apply as a coarse wet spray or spot treatment
- For optimal results, solution should be used within 24 hours
- Clean application equipment daily to avoid clogging. If product remains in the application equipment overnight or longer, **vigorously** shake the tank, pressurize the sprayer and disperse 1-3 oz. of material into a container to clear the line and nozzle

Use Areas

- Approved for use on mattresses, box springs, headboards, walls, floors and baseboards
- For indoor use only in non-food areas, including but not limited to homes, hotels and offices
- **Not** for broadcast use or as a space spray
- **Do not** use in commercial food/feed processing, preparation, food/feed storage or serving areas
- **Do not** allow adults, children or pets to enter treated area until treatment is dry

CrossFire will not stain water-safe fabrics or surfaces. It may leave a visible residue on dark surfaces, similar to a wettable powder, which can be removed easily with a damp rag.

Always read and follow label and SDS directions.
