CimeXa Dust

Product Codes:

CXID032: 32 fl oz (4 oz by weight) puffer bottle
CXID005: 5 gallon (5 lbs by weight) pail

CimeXa™

insecticide dust

[Label](#) | [SDS](#) | [Product Sheet](#) | [Bed Bug Control Guide](#)

Hazard Tier 3 Pesticide

CimeXa™ Insecticide Dust is the premier industry-leading insecticide for control of bedbugs and many other pests. Its **engineered silica** composition achieves rapid control while remaining viable for up to ten years when undisturbed. With its broad label usage, CimeXa™ Insecticide Dust is a comprehensive asset for pest elimination to service professionals.

- For control of bed bugs, fleas, ticks, lice, roaches, ants, firebrats, silverfish, spiders, mites and drywood termites
- Kills bed bug adults, nymphs and nymphs hatched from dusted eggs – including pyrethroid-resistant bed bugs
- The preferred treatment for brown recluse, yellow sac, hobo and other persistent spiders indoors
- Labeled for treating cracks, crevices, voids, mattresses, carpets, pet rest areas, attics and many other areas
- Odorless, non-staining desiccant structure will not absorb water vapor except in very high humidity conditions, preventing clumping and maintaining its active ability once applied
- Easy to apply - can be used as a dust or mixed with water and sprayed
- Low toxicity, **engineered silica** base exhibits exceptional absorption of water (in liquid form) and oil, which destroys the waxy cuticle of insects, resulting in rapid dehydration and death
- Much better consistency and over three times faster compared to diatomaceous earth
- Remains viable for up to 10 years when undisturbed
- Should not be used in damp areas
