MGK Bedlam Research Update

Efficacy studies support that Bedlam is effective against both resistant and susceptible Bed Bugs and their eggs. **DOWNLOAD THE ENTIRE FILE FROM THE BOX TO THE RIGHT.**

Pest control professionals can be confident using Bedlam to help control bed bugs and their eggs.

In the studies analyzed, Bedlam applied as a direct spray killed 100% of field, susceptible lab strains, and resistant strains of bed bugs.

(http://mgk.com/wp-content/uploads/2013/06/Bedlam_Adult_Efficacy_Chart_WEB.jpeg)

Additionally, across multiple studies Bedlam controlled 91% of susceptible strain eggs and 97% of resistant strain eggs.

(http://mgk.com/wp-content/uploads/2013/06/Bedlam_Egg_Efficacy_Chart_WEB.jpeg)

Controlling bed bug eggs (or the few emerging nymphs) is extremely important because surviving eggs is perceived as treatment failure and a cause of call-backs.
