Control general pests in commercial accounts easier and faster than ever. When it comes to controlling pests in commercial accounts, Phantom pressurized insecticide delivers:

Formulation dries in "crystals" for enhanced bioavailability.

Ready-to-use formulation reduces overuse and eliminates mixing and cleanup.

Kills on contact a broad spectrum of pests in commercial accounts, including bed bugs, bed bug eggs *, ants and cockroaches.

Approved for use in food handling and non-food-handling areas for commercial accounts.

Leaves no visible residue.

Reduced pesticide load and precision application that make sense to your customers and for your business.

System III compatible

[Safety Data Sheet \(SDS\) / Product Label](#)
General Info**General Information**

Compared to ordinary sprays that leave a residue, Phantom® pressurized insecticide delivers the active ingredient more effectively by drying in crystals without leaving a visible residue.

Still delivering the trustworthy performance and flexibility that has defined the success of Phantom® termiticide-insecticide:

The only liquid nonrepellent, non-IGR labeled for indoor general pest control including commercial food handling areas.

Will not disperse or "lock in" pests.

Pests are exposed to the active ingredient either by ingestion or contact.

Effective on pyrethroid-resistant strains of bed bugs and cockroaches.

Phantom pressurized insecticide is also labeled for:

Beetles
Centipedes
Flies
Scorpions
Spiders
Wasps
