

Onslaught® FastCap provides fast-acting and long-lasting residual control of spiders, scorpions and a broad spectrum of other insects.

- Fast acting microencapsulated formula kills fast
- Unique formula contains Exponent® brand synergist and two other active ingredients
- Onslaught FastCap is flexible it may be used indoors and outdoors, in homes and in food and non-food areas of commercial structures
- Indoor broadcast treatment option
- Onslaught FastCap may be used in and around livestock facilities, on turf, ornamentals and landscapes
- Easy-to-use polymeric formulation
- · Economical to use
- Kills mosquitoes, including the Aedes mosquito that may carry/transmit the Zika virus

### **Product Specifications**

Signal Word	Caution
Packaging	Pints (6 per case)
EPA Registration Number	1021-2574
Ford Hondling	Facilia food oo

Food Handling For use in food and non-food areas

Stability of Undiluted Product Stable

**Stability of Diluted Product** Do not allow to stand overnight.

Agitate thoroughly during mixing and

periodically after diluted.

Appearance Creamy, yellow/light brown

Odor Slight, sweet odor

Active Ingredients Esfenvalerate, Prallethrin, piperonyl

butoxide

**Flammability** Not classified as flammable or

combustible by OSHA

**Mode of Action** Sodium channel modulator – disrupts

insects' nervous system. Inhibits mixed

function oxidative system.

Class of Chemistry Pyrethroid, synergist

Respirator Required Not required
Mix or Dilute in Water only

Activity Residual – up to 12 months

Shelf Life 3 years in original commercial

packaging

#### **Use Areas**

## Indoor in Food and Non-food Areas, such as:

Homes

Food processing plants

Restaurants Schools Warehouses Hotels

### Outdoor Perimeter Treatments to Areas, such as:

Around garbage cans

Porches Patios Carports Garages Fence lines

On Trees, Lawns, Landscapes and Turf

In and Around Livestock Housing

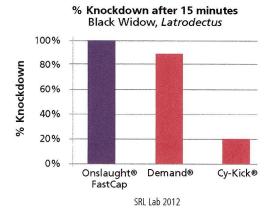

### **Method of Application**

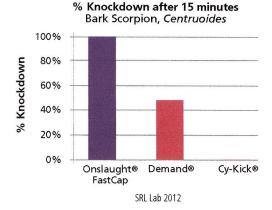

- Indoor and outdoor broadcast surface treatment
- · Crack and crevice treatment
- Spot treatment
- · Perimeter spray
- Foliar spray treatment
- Tank mix or apply alone
- Injection into wall voids

# Best Practices when using Onslaught® FastCap Microencapsulated Insecticide

### Dilute with water only

The suspension is only intended for dilution in water, not oil.

For a complete list of insects controlled, refer to the product label.

Always read and follow label and SDS directions.

To learn more, visit www.mgk.com, call 1-800-645-6466 or send an e-mail to brands@mgk.com.

# **PAST CAP**Spider & Scorpion Insecticide

### Test the surface first

Onslaught FastCap may be sprayed on any surface that will not be stained by water. If you are concerned about staining or are not sure if a surface is water safe, test the surface by spraying a small amount in an inconspicuous area before making a broad application.

### Mixing tip

Shake Onslaught FastCap bottle well prior to mixing. Clean spray equipment before using or diluting Onslaught FastCap. For dilution, add ½ the required water to spray tank, then add the appropriate amount of Onslaught FastCap. Agitate the mixture, and then slowly add the remainder of the water. Agitate the spray thoroughly before using and also occasionally during use to ensure dispersion. If you use a spray filter screen, they should be 50 mesh or larger.

## Use Onslaught FastCap as part of an IPM program

Tank mix Onslaught FastCap with an IGR such as NyGuard® IGR Concentrate to break the insect growth cycle and control future emerging insect populations. Do not apply Onslaught FastCap as a fog or space spray. Fog first with a product such as Riptide® Water-Based Pyrethrin ULV to get the quick knockdown action of the fog followed by a surface application of Onslaught FastCap for residual control.

### **Key Insects Controlled**

# Onslaught FastCap is labeled for the control of the following insects and other listed pests:

Ants (excluding fire ants)
Asian Lady Beetles
Bed Bugs
Boxelder Bugs
Brown Marmorated Stink Bugs
Carpenter Ants
